

## Marubozu Indicator

You can find all our instructions in video format on our Youtube channel (english subtitles available):

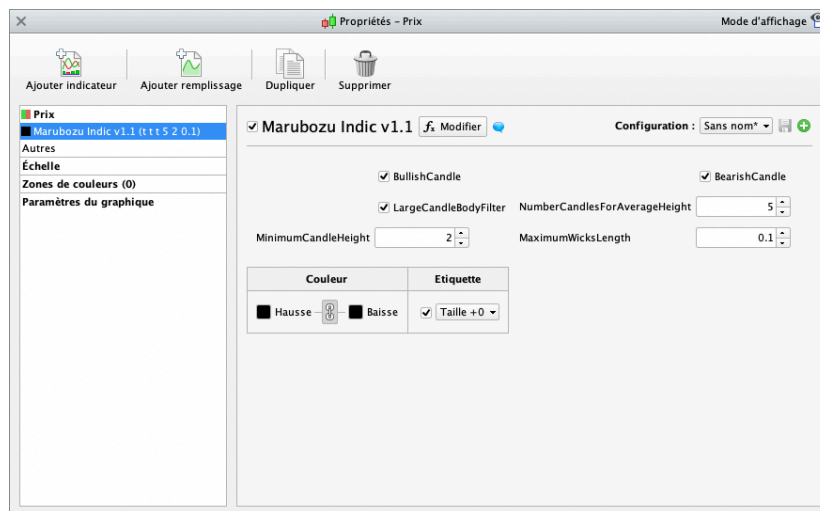

<https://youtu.be/OABHT00Xqd8>

### I. User Guide

Display a green arrow under bullish Marubozu and a red arrow over bearish Morubozu.

Works on all timeframes.

Display depends on the settings available in the configuration menu :

The values shown above are given as example and do not constitute an optimal or recommended setting, everyone should find his own settings.

- BullishCandle = display of bullish Marubozu. Ticked = activated / Unticked = deactivated.
- BearishCandle = display of bearish Morubozu. Ticked = activated / Unticked = deactivated.
- LargeCandleBodyFilter = activation of "large candle" filtering. Characterised by the 2 variables below. Ticked = activated / Unticked = deactivated.

- $\text{NumberCandlesForAverageHeight} = \text{number of previous candles used to determine the average candle body size,}$
- $\text{MinimumCandleHeight} = \text{minimum size of the body of the current candle, expressed as a multiple of the average size of the last X candles,}$
- $\text{MaximumWicksLength} = \text{maximum length of the top and bottom wicks. Expressed as a multiple of the body of the candle.}$

**NB: Be careful to set the same parameters in the indicator and the screener, so that the screener results are shown correctly on the graph.**
